PREFACE

*This book is written for you,
in order to encounter your future self;
this book travels through time and space,
so that we can build an excellent future together!*

When it comes to the future, how far away do you think it is?

The next 10 years, 20 years ...

Most of the prophecies and visions in this book will be fulfilled in the next 10 years, and some will take 20 years to come true.

§ You are a multi-million or multi-billion-dollar investor looking for the next big thing.

- ④ You have technical talents or own patents and are thinking about how to use technology to create new products and services to gain market share.

- § You are an elite business person, exploring the new rules of the game and opportunities that will dominate the economy of the future

- ☺ You are not one of the first 3 types of people, but you are equally fascinated by this book. Because your subconscious is curious and hopeful about the future, and you are looking forward to meeting your future better self here ...

You haven't thought of it
between people in the future

What is the biggest difference
but others have already realized it

Technology Application Scenarios – the future **You**

Everything that can be imagined can also be realized.

This is not a science fiction, this is fact!

--- ScenaReality

QG Future Excellence

When you enter a future scenario, you may encounter your future self there, not only as a recipient, but also as an instigator, enabler, and bringer to life of the scenario...

Employing your technical skills or financial investments, or management abilities, or drive for change to impact the world.

- Scenario 1 **Smart entertainment**
- *Enjoyment is the highest creativity*

- Scenario 2 **Business negotiation**
- *Perfect logic for a win-win situation*

- Scenario 3 **Healthy Living**
- *Health is King*

- Scenario 4 **Creating your own home**
- *You are the creator of your own world*

- Scenario 5 **Efficient and fun travel**
- *A wonderful time on the way*

- Scenario 6 **The democratization of high-end investments**
- *Aristocratic investing by normal people*

- Scenario 7 **Automated transformation of thoughts into works**
- *What you get is what you think*

During the Fourth Industrial Revolution, significant technological advancements will occur at an exponential pace. The widespread utilization of science and technology will greatly alter our lifestyle, work, entertainment, social interactions, health, and many other facets. The future scenarios developed by QG's Future Excellence are imaginative and forward-thinking, providing insights into the most essential aspects of the future world and industries.

I am confident that you will be impressed by the seven selected **ScenaReality** scenarios. If you aspire to become a catalyst or executor of future scenarios, leverage your assets and skills to play a role in shaping the future world, and establish yourself as a leader in a particular industry over the next decade, we invite you to join QG Future Excellence for collaboration, idea exchange, consulting, and training services.

**All software names mentioned in the scenarios are purely fictional and the product of QG Future Excellence's imagination. Any similarity with existing software names is purely coincidental.*

Case studies INNOVATION 2

Digital Business Model Transformation

A contemporary business model tailored to the technology is essential for maximizing its commercial potential.

A contemporary business model tailored to the technology is a must for success!

--- **InnoThink**

QG Future Excellence

W

Whenever human society experiences a major technological revolution, many existing business models

no longer keep pace with the development of products, services, and operations. The ongoing fourth industrial revolution has already led to the gradual elimination of some traditional business models, while new technologies have also given rise to new business models.

To fully leverage the commercial potential of technologies, a systematic and contemporary business model that is tailored to the technology is necessary. These new models can either evolve from established practices or emerge as entirely new concepts for the new era.

This is an excerpt from the **InnoThink** course of QG Future Excellence, showcasing 4 case studies with innovative methods for transforming business models:

- **Transformer method**
- **Industry ^{New Tech} upgrade**
- **Analogy method**
- **Mega Platform**

In a continuously evolving technological and market landscape, the need for business model innovation and transformation will persist. QG Future Excellence's research and development efforts have kept pace, providing coverage across a diverse range of industries. We hope that these four case study excerpts will spark your interest and awareness of business model transformation. Once you have honed the principles and cultivated the relevant critical thinking, you will be equipped to tackle numerous shifts while upholding core stability. These shifts refer to the significant external disruptions and uncertainties that take place in the current era and environment, while stability refers to your own internally developed cognitive and innovative capacities.

May WE have a brilliant and
colorful future!
